* To take advantage of our offer NetSafety requires a two-year commitment to utilize our Internet Service Provider Partner - Surfaway Internet Services Inc, for dial-up Internet access. When you place your pre order for the low-cost personal computer, you will be charged an annual \$60.00 ISP deposit. Upon shipment of your computer, and your activation of the Internet access account, your monthly fee for dial-up Internet access will be \$14.95. Surfaway will include the NetSafety Internet Safety Solution for your children and teenagers at no additional fee. In the event, you chose to cancel the ISP connection, you will incur a \$100.00 cancellation fee, and your future NetSafety Fees will be billed directly from NetSafety Corporation USA. Which is currently \$7.95/mo.

You will not be billed or charged for your pre-order computer until the system ships to you. Currently we anticipate beginning shipment of the PC's on July 15, 1999. Due to our customer service policies, we are delivering our computer systems to 10,000 units monthly until adequate inventory, manufacturing, and customer services needs are met. Our commitment to you is to offer you a value in our products and services.
